## EDUCATION

---

Islington College	<i>Kamal Margha, Kathmandu</i>
<i>Bachelors of Science in Computing - Upper Second Class Honors</i>	<i>2019 - 2022</i>
Kendriya Vidhyalaya	<i>Lazimpat, Kathmandu</i>
<i>High School (Science Specialization) - 81%</i>	<i>2017 - 2019</i>
DAV Sushil Kedia Vishwa Bharati School	<i>Jawalakhel, Lalitpur</i>
<i>CBSE - 9.8 CGPA</i>	<i>2017</i>

## EXPERIENCES

---

<b>Velorona LLC</b>	Remote
<i>Senior Frontend Engineer</i>	<i>Aug 2023 - Present</i>

- Led the architecture and delivery of a scalable enterprise-grade CRM using Next.js and MUI, enabling HR and staffing teams to handle 10,000+ transactions/month with sub-second load times and seamless UX
- Designed and integrated core business modules including time tracking, payroll automation, invoicing, expenses, and project scheduling, driving a 3× improvement in operational efficiency
- Built advanced reporting dashboards with Chart.js, Recharts, and React PDF, automating analytics workflows and reducing manual reporting by 80%
- Developed a reusable design system and component library, improving UI consistency and reducing new feature build time by 40% across the product suite
- Led the end-to-end development of the public marketing site using Next.js, ShadCN UI, and Sanity CMS, boosting lead conversions by 65% and increasing organic traffic by 120% YoY through SEO, SSR, and content-driven architecture
- Integrated Google Analytics, Plausible, and Umami to track user behavior and funnel performance, enabling data-driven UI/UX improvements and marketing decisions
- Deployed both platforms to Vercel with CI/CD pipelines, achieving 95+ Lighthouse scores, zero-downtime rollouts, and optimal performance across all devices
- Integrated Sentry for real-time error tracking and logging, reducing bug resolution time by 60% and improving overall platform stability
- Implemented JWT-based authentication, role-based access control, and HTTPS-secured APIs to ensure robust security and data integrity
- Operated within Agile sprints, collaborating closely with designers, product managers, and backend engineers to ship high-impact features on tight timelines

**Ekbana Solutions***Frontend Engineer*

Lalitpur, Nepal

2022 - 2023

- Developed and maintained web applications using Vue 2 and 3 based on Japanese client requirements, focusing on calendar-based scheduling systems with multilingual support and precise time/date logic
- Migrated legacy Vue 2 codebases to Vue 3, introducing modern composition API patterns and improving maintainability and performance across core modules
- Collaborated with cross-functional teams in an Agile environment to deliver customized features across multiple client-facing platforms, adapting quickly to shifting priorities and feedback loops
- Worked on the company's flagship Next.js project, "Basestation", from inception contributed to UI system planning, initial database modeling, and frontend architecture using Ant Design and Redux Toolkit
- Implemented scalable UI components and Redux-based state management, accelerating feature delivery and reducing code redundancy across modules
- Built a fully customizable in-app calling feature using Twilio within Basestation, including a draggable call box UI that met strict client specs for desktop and tablet overcoming complex event handling and layout constraints to deliver a seamless, persistent communication experience
- Ensured performance, accessibility, and responsiveness standards across all devices, improving overall user satisfaction and usability metrics

**S.B Solutions***Frontend Developer*

Kathmandu, Nepal

2021 - 2022

- Transitioned from intern to production developer, contributing to UI templates and form systems for enterprise banking platforms used by major financial institutions in Kathmandu
- Built responsive, accessible frontend interfaces using HTML, CSS, Bootstrap, and Nebular UI, aligning with strict design guidelines and security protocols
- Developed modular, reusable components in Angular and React to streamline development for large-scale client projects
- Gained exposure to backend development through hands-on learning in Java and Spring Boot, which informed the architecture choice for my Angular + Spring Boot final year capstone project
- Collaborated with cross-functional teams in an Agile environment, participating in sprint planning, QA cycles, and UI reviews

## PROJECTS

---

### **Eeshan Mahadev (Full-Stack Ecommerce Platform)**

*Tools: Next.js, Prisma ORM, Supabase (Postgres), NextAuth.js, TailwindCSS, Stripe, Vercel*

2022

- Designed, developed, and sold a production-ready ecommerce platform for a client transitioning from Facebook-based sales to a dedicated web store
- Architected and deployed the platform with secure authentication, product catalog, and checkout flow
- Implemented advanced product listing with complex filtering, ratings & reviews, comment system, and discount integration
- Built an inventory management system with real-time stock tracking, price adjustments, and promotional campaigns
- Integrated Stripe payments, automated invoicing, and Supabase Storage for product images; deployed with zero-downtime CI/CD on Vercel achieving 95+ Lighthouse scores

### **Sajilo Bazaar (Mobile Marketplace App)**

*Tools: Expo React Native, Supabase Auth & Storage, NativeWind, React Hook Form, Zod*

2022

- Developed a cross-platform mobile app enabling users to create listings, manage profiles, and communicate via in-app messaging
- Leveraged Supabase's real-time subscriptions and row-level security for secure, live data sync across Android and iOS
- Designed a responsive and intuitive UI with NativeWind, ensuring smooth UX on both mobile platforms
- Optimized offline access with local caching strategies, ensuring usability even in low-connectivity environments

### **Drishti (SaaS CRM Dashboard)**

*Tools: Next.js, Prisma, Supabase, ShadCN UI, Recharts, Vercel Analytics*

2023

- Built a SaaS-ready CRM dashboard with lead tracking, project management, and analytics visualization
- Integrated dynamic charts and reporting tools with Supabase queries, enabling real-time performance insights
- Deployed on Vercel with server-side rendering for fast load times and optimal SEO performance
- Created a scalable component library with ShadCN UI, enabling rapid feature development and design consistency

## Kurama (कुरामा) (Real-Time Chat Application)

Tools: Next.js, Supabase Realtime, Zustand, TailwindCSS, Vercel

2023

- Created a full-stack real-time chat platform with user authentication, private rooms, and message history persistence
- Implemented live typing indicators, read receipts, and online status tracking using Supabase's realtime features
- Optimized state management with Zustand to ensure instant UI updates and a smooth messaging experience

## Portfolio & Blog CMS

Tools: Next.js, Sanity CMS, TailwindCSS, Vercel, Google Analytics, Plausible

2024

- Designed and implemented a personal portfolio with integrated blog CMS powered by Sanity for dynamic content management
- Added analytics tracking with Google Analytics and Plausible to monitor traffic and engagement metrics
- Achieved fully responsive, high-performance design deployed on Vercel with automated builds and previews

## Prashna (Technical Quiz Management System)

Tools: Angular, Nebular UI, Spring Boot, MySQL, Bootstrap

2021 (Final Year Project)

- Designed and developed a customizable quiz management platform for IT companies to conduct technical screening rounds
- Implemented role-based access for admins, HR, and candidates, ensuring secure question distribution and result tracking
- Built a responsive, themeable UI with Angular and Nebular UI, featuring dynamic question forms, time limits, and automated scoring
- Integrated detailed analytics and result reports to help recruiters evaluate candidate performance efficiently

## CERTIFICATES

---

### Responsive Web Design

FreeCodeCamp

Jan 2021

### Build Modern Web Apps with React

Google Cloud Skills Boost

Feb 2021

### AWS Cloud Quest: Cloud Practitioner

Amazon Web Services

May 2023

## SKILLS

---

**Frontend Development:** Next.js, React, Vue.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, TailwindCSS, ShadCN UI, MUI, Ant Design

**State Management & Data Handling:** Redux Toolkit, Zustand, React Query, Context API, SWR

**Backend & API Integration:** Node.js, Express.js, REST APIs, GraphQL, Supabase, Prisma ORM, Drizzle ORM

**UI/UX & Design Systems:** Responsive Design, Accessibility (WCAG), Figma to Code, Component Libraries, Themeable UI, Animations (Framer Motion)

**Testing & Quality Assurance:** Jest, React Testing Library, Cypress, Playwright

**DevOps & Cloud Deployment:** Vercel, Netlify, AWS (S3, CloudFront), Docker, GitHub Actions, CI/CD

**Database:** PostgreSQL, MySQL, MongoDB, Firebase Realtime Database, Supabase

**Other Skills:** Performance Optimization, SEO (SSR & SSG), Agile Development, Cross-Browser Compatibility, Internationalization (i18n)
